(57) Abstract :

Robots is the combination of mechanical effectors, sensors, and computers and AI has combined them together for a better future. The project highly advantages for the human civilization. With the number of pandemics hitting the world this kind of robots powered by AI, will be very helpful in all sectors of life. With the help of AI, we have created a robot which will eliminate the need of physical contact during diagnosis and treatment process. The features like voice control, obstacle sensing, live streaming camera, temperature sensing have been furnished in this robot. Keywords: AI Robot, Covid-19, Sensors, Voice Assistance, Remote Control, Solar Charging.
