(57) Abstract :

The present invention discloses a herbal drink formulation designed to alleviate acidity, indigestion, and bloating using a blend of natural ingredients. The composition includes fennel seeds (50g), coriander seeds (30g), cumin seeds (30g), licorice root powder (20g), dry ginger powder (10g), cardamom (10g), amla powder (20g), and rock sugar (20g). The preparation method involves dry roasting select ingredients, grinding, and blending with other herbal powders for uniform consistency. This herbal antacid powder effectively neutralizes stomach acid, supports digestion, and soothes the stomach lining without harmful side effects. Unlike synthetic antacids, it is non-habit forming and safe for regular use. The formulation is pleasant in taste and offers multiple digestive health benefits, making it an excellent natural alternative for managing acidity and digestive discomfort.
